### SUGGESTED PROJECTS

1. More hands on demonstrations.
2. Learning to make feature rings. (Basic through to advanced.)
3. Training video suggestions on website or YouTube.
4. Jig designs and specifications to use when preparing, cutting, assembling, or turning your project.
5. A team project from start to finish at meetings with all members being involved. This will then be sold for Seggie fund raising. Tania's artistic challenge may result in a suitable item for this.
6. Don's 3D Trivet/Teapot stand.

### AROUND THE TABLE

AITON – brought in more 3mm thick MDF that will be useful for cutting the templates and some solid Jarrah kitchen cupboard doors kindly donated by Jim Parker. All available for whoever wants to take some.

He apologised for having to leave at 1100 and would cut his trivet pieces to assemble at the Thursday 13 meeting.

NOEL – showed his star pattern. The 30 degree cuts were easy bit angles on the larger lengths very difficult to cut accurately.

STAN – brought in pages of various designs he is keen to make but will need help to cut the pieces.

ROGER – explained the difficulty he was having in accurately cutting segments. He had completely remade his mitre saw wedgie sled, and with more care was getting better results. Syd stressed that Roger must ensure that his pieces of timber are square.

DON – showed his featured bowl which is a work in progress for a wedding present. The finish is Livos counter top oil which Timbecon stocks. Don also showed the Fonson Tools stop guage which he thinks is excellent. Aiton has also ordered one.

The meeting adjourned to the shed.
