

Notes for making the Greek Key feature ring Bowl 3 2025

- 1 You need to make strips in two different timbers one dark the other light.
The light wood needs to be 20mm wide and 4 mm and 8mm thick and a total length 1432mm for the 4mm and 1000mm for the 8mm.
- 2 The Dark wood 20mm wide and 5mm thick a total length of 2780mm
- 3 I've add more than you will need but if you make them up of small lengths you may need more.
- 4 Step 1 start by gluing up item D and 6 times 12minimum do 18 to be safe.
- 5 Step 2 Sand level step one very lightly then add B and 5. Don't forget to do all 12/18!
- 6 Step 3 sand the ends flush and add C and 4
- 7 Step 4 Sand the top and bottom flush and add E and 3
- 8 Step 5 Sand the ends flush and add A
- 9 Step 6 Sand Top and Bottom of A flush and add 1
- 10 Step 7 Sand the ends flush and add 2 to both ends.
- 11 When they are all dry trim the sides so they are clean and 90 deg to the base (1)
- 12 Lay them out end for end and set them up so they all face the same direction.
Then flip alternate ones so you have one up and one down as shown.
- 13 Next come the hard part you need to cut the 15 deg angle on the side but make sure you do it so the cut face away from the front. The way you had them lined up in step 12.

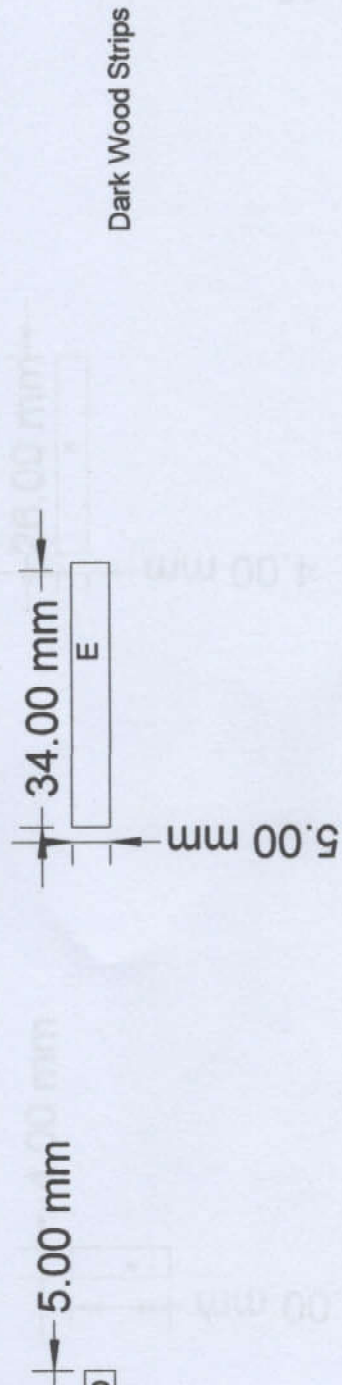

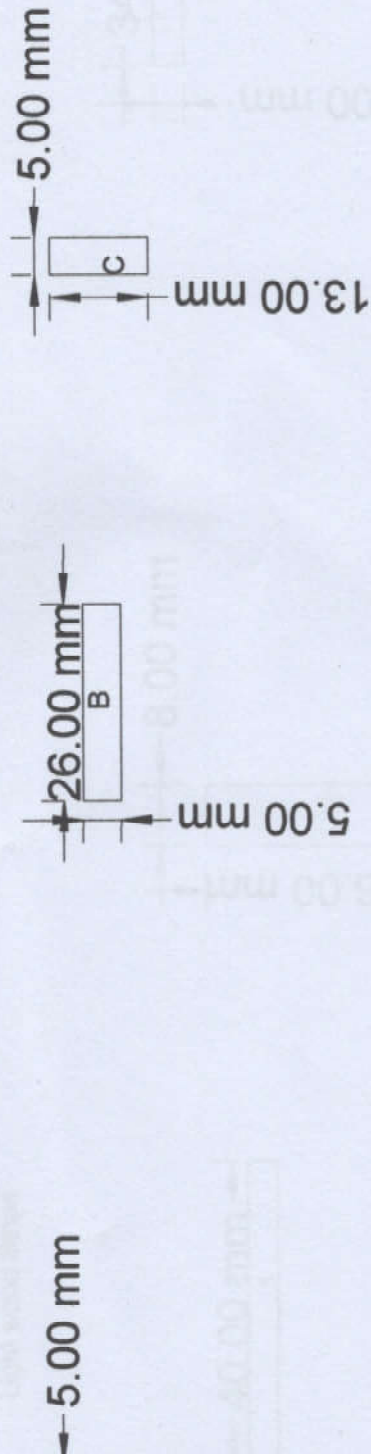

Best of luck and have a good time making the feature ring.

Don

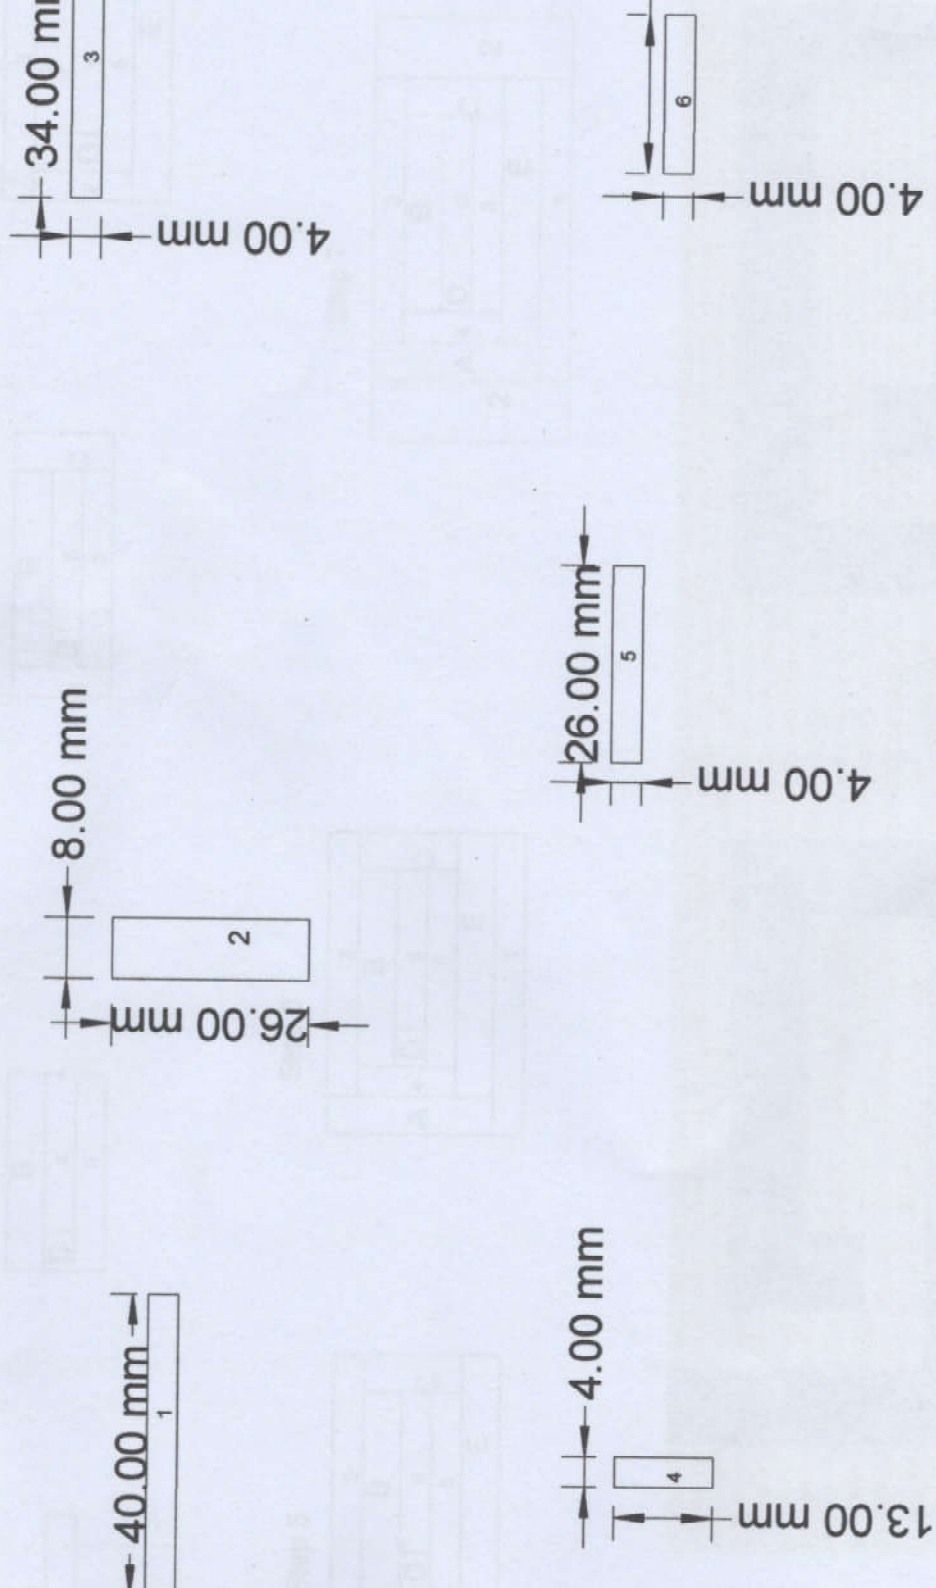

Greek Key Cutting List 2025 Version 2

Item	Wood Type	Length	Hight	Width	Qt	Total Length	Total 8 mm	Total 4 mm	mm	Light wood	Light wood	(Use 8mm for Number 2)
1	Light	40	4	25	24	1056			1000.0			
2	Light	5	26	25	24	216			3380			
3	Light	34	4	25	24	912						
4	Light	4	13	25	24	192						
5	Light	26	4	25	24	720						
6	Light	21	4	25	24	600						
A	Dark	5	22	25	24	216			2780			
B	Dark	26	5	25	24	720						
C	Dark	5	13	25	24	216						
D	Dark	5	4	25	24	216						
E	Dark	34	5	25	24	912						
							Total 5 mm			Dark wood
