scale: full size

Salt and pepper grinders in sheak and jacaranda with oil and air brushed finishes.

(*) - Use dimensions to suit 'CrushGrind' Shaft' mechanisms. See supplier's recommendations.
 (**) - These dimensions are based on a 195mm shaft. Adjust for other shaft lengths.
 (Ø^{***}) - 'CrushGrind' mechanisms are designed to press fit into place. This may be difficult with some hard woods, in which case it may be necessary to slightly increase these diameters over those recommended. The mechanism will then need to be glued in place using an epoxy or other suitable adhesive.

SALT & PEPPER GRINDERS (For use with 'CrushGrind'mechanisms)
