

VALE

FRED LAURITSEN

Fred was one of nature's gentlemen, ever ready to help and advise anyone who requested assistance.

He was a genius at inventing machines and tools and solving complex problems.

In 1995, at our weekend workshop, all tools, machines etc. invented by members were exhibited including Fred's bandsaw and timber clamp for bandsaws which were greatly admired.

Fred served on the Mandurah committee from 1989 with his usual enthusiasm and quiet achievement. That was his style.

All Mandurah members extend their sincerest and deepest sympathy to Fred's dear wife Roma and all the family.
